

GROUP 582 SOCKETS & ACCESSORIES - 1/2" SQUARE DRIVE

Sockets & Accessories - 1/2" Square Drive

KENNEDY PROFESSIONAL

Deep Bi-Hexagon

The most popular drive size used in the service and maintenance industries. This popularity is due to the strength and robust nature of 1/2" drive. All Kennedy Professional sockets have a unique double knurl to give a high grip which is essential for a quick tool change when your hands are greasy/oily. The 12 point bi-hexagon side drive design will give a higher torque than normal sockets, grip worn nuts and will not round off existing nuts.

Manufactured from chrome vanadium and are fully chrome plated with a mirror finish and aluminium free to ensure non sparking. Chamfered leading edge ensures easy fastener location. Used for tightening and untightening nuts where the threaded stem of the mating fastener prevents access with standard length sockets.

Registered Design No. 2053516UK.
