

Silicone Release Spray

SR1-500B - for Plastics & Rubber

Heavy duty Silicone Lubricant and Release agent. Formulated with a high silicone content. The product is suitable for a wide range of uses. SR1-500B is a dry non-oily, non-greasy product. Water clear with no odour. Size: 500ml aerosol.

Heavy-Duty Silicone Release Spray

SR2-500B
Heavy duty Silicone Lubricant and Release agent. Formulated with a high silicone content. The product is suitable for a wide range of uses. A dry non-oily, non-greasy product. Water clear with no odour. Size: 500ml aerosol.

Mould Release Dry Film PTFE Lubricant

SR3-500B
Solent Mould Release P.T.F.E. Dry Film is a micro-thin surface coating that is used to coat the inner surfaces of injection moulding tools/dies, thus enabling easy component release. The coating will not bridge complex mould profiles and will not interfere with precision fits. The applied P.T.F.E. film will not transfer to the moulded item. The product can also be used in any location that requires a dry slip surface such as production line slides, tracks or tables.

Non-Silicone Release Agent

Formula 5 - Medium Duty

A medium duty, dry film non-silicone mould release agent. Provides excellent release for all types of thermoplastics, some thermosetting plastics, silicone rubber and many other types of rubber. Will not interfere with post-moulding treatments, such as painting, printing or gluing. Will not build up in the mould. Operational up to 150°C. Recognised by Underwriters Laboratories Inc.

Medium Duty Release Agent -

Formula 6
A medium duty, silicone mould release agent. A general purpose release agent for all thermoplastics and many types of rubber. Improves surface finish, will not build up in the mould. Operational up to 200°C. Fitted with 360° Spray System for all angle use. Recognised by Underwriters Laboratories Inc.

400ml	-0120C	£7.03	£6.33

Minimal Transfer Non-Silicone Release Agent

Formula 11

A minimal transfer, dry film, non-silicone release agent. Provides an ultra thin, dry film, especially effective on 'electronic' grade polymers such as Polycarbonate and ABS, particularly suitable for the release of HIPS (High Impact Styrene). Will not interfere with post-moulding operations, such as painting, printing or gluing. Multiple release per application can be achieved giving improved economy in use. Operational to 1200°C continuous, and intermittent to 2100°C. (Although multiple release properties are reduced).

400ml	-0105N	£7.64	£6.88

Freeze & Release Aerosol

8040
Releases seized and corroded parts by shock freezing (-43°C). Released parts remain lubricated and protected from corrosion.

400g	-8040W	£5.73	£4.47

Silicone Release Spray

SP90
Silicone dry lubricant. Non-staining. Ideal for use as a mould release or dry lubricant on any steel, plastic, glass, rubber, or wooden surfaces. Equivalent to Rocol SL spray and Ambersil silicone.
