

**Super Flex-Back
30m/100ft Coils**

Super Flex-Back is recommended for general purpose cutting at an attractive cost on easy to machine materials; blades have excellent fatigue endurance to give long life on machines running at a high surface feet per minute.

Features and Benefits

High carbon/chromium "pinpoint carbide" tool steel. Hardened and tempered tooth tips - 64/66 Rockwell C Hardness. Economical, general purpose cutting.

Recommended Application

Light section low alloy steels, ferrous and non-ferrous metals, plastics furniture and composition board.

**SIMONDS® Hard Edge Flexible Back
30m/100ft Coils**

Carbon steel blade combines long blade life and efficiency under average conditions, with lower costs. Suitable for sawing low alloys, non-ferrous metals and synthetics. Available as Regular, Hook and Skip teeth.

**Premium High Carbon Steel Blade
30m/100ft Coils**

Heat treated to produce a spring tempered back, giving greater tensile strength and straighter accurate cutting at higher feeds. It is suitable for interrupted cuts and is available as Regular, Hook and Skip teeth.
