**Tilt Boxes**

The Tilt Box system is based on a range of clip together plastic housings, which contain transparent small parts boxes with a forward tilt action to give access. Tilt box storage is useful in all environments including office, retail and manufacturing providing highly visible, dense and dust protective storage for most small components. Choose the individual models, or the mixed kit of the 9/6/5/4 compartment versions. All models are 600mm wide.

**Bench Stands and Bench Kits**

Tilt box units can be located within this bench top stand which will accept any combination of tilt boxes within the usable height of 500mm. Supplied in red only. The most popular tilt box combination is shown. Dimensions: 610mm wide x 150mm deep x 500mm high.
